## Microsoft Dynamics 365 Sales

# A complete and transparent database

Keep all the data about your customers, opportunities, and contacts **in one place**. Configure account relationships, attach documentation, and record contract billing.

CRM

### **Activities and timeline**

Assign tasks, plan events, send e-mails or keep track of phone calls. Events are **automatically transcribed** to your calendar and sent e-mails are tracked back to Microsoft Dynamics 365 Sales. On the timeline, you can find a history of all records.

### Marketing campaigns

Approach potential customers with **bulk e-mails** or send regular newsletters to your customers. Carry out campaigns with allocated budgets, evaluate their effectiveness and **attract new leads**.

### Dashboards and reporting

Track the performance of your salespeople, locate weak spots and formulate a strategy based on the precious data. Keep track of the actual status of business opportunities or planned tasks and make well-thought-out decisions.

### **Product catalogs**

Define product features and price specifications, create discount mechanisms, and set out **specific rules** for using these mechanisms. Add products to the offer and allow the system to **calculate the final price automatically**.

# Microsoft Dynamics 365 Sales

### **Effective business management**

Microsoft Dynamics 365 Sales allows you to **cover the entire sales process** from the initial contact to the execution of the sale. Thanks to the interactive **responsive design** and a mobile app, you can work from anywhere. Use business process flows to help your employees keep records **according to your internal regulations**. Send questionnaires to your customers and use the findings to streamline your sales strategy. Give salespeople priorities based on AI and predictive assessment. The Microsoft Dynamics 365 Sales solution can be **individually tailored to your needs** by creating specific workspace fields, forms, or interactions.

#### **Unrivaled connectivity**

Connectivity with LinkedIn Sales Navigator allows you to display corresponding LinkedIn profiles directly in the CRM environment. It connects the timelines of Dynamics 365, LinkedIn Sales Navigator, and Microsoft 365.

in

Integration with Microsoft 365 Apps allows for editing quotations in Word, exporting reports to Excel, complex tracing of e-mails, tasks, and events from Outlook, or saving files to Microsoft SharePoint shared data storage.

Integrated **Teams** chat in the Dynamics 365 environment enables real-time collaboration **without switching between applications**. Thanks to Microsoft Teams, you can call a customer from the app's environment with a **single click**.

Using **Power Automate** can **automate** routine processes and save you precious time. The user is kept informed of any important changes, for example by sending an immediate e-mail with a description of the change.

Dynamics 365 Sales enables **native connection** to other Dynamics 365 apps. For example, when integrated with Dynamics 365 Marketing, leads can be generated from marketing campaigns and **passed on to sales department**.

**Power BI** allows you to create advanced interactive reports to assist with forecasting. Boxes and charts can be added directly to the Dynamics 365 environment. You can actively collaborate with other users on these reports.
